Microfeed

Microbelt

Tatham are the worldwide leaders in the field of Retrofit Control Systems for Carding and Blending applications. Our application experience and technical expertise has led to a range of innovate systems which offer the ultimate in feed regularity whatever the application.

- MICROWEIGH TS
- MICROFEED TS
- MICROLAP TS

All systems offer performance and reliability unparalleled throughout the industry. A combination of leading edge design and operational performance offer the most accurate method of feeding a card unit or subsequent processing machine.

Features

- New Control and Logical components
- High Speed Communication Protocols
- TFT Graphic Display with all settings and adjustments
- Animated Cycle Status Graphics & Real Time Event Logging
- Graphical Production Information (GPI)
- Live Engineering Diagnostics
- Remote Internet Diagnostic Support and Service
- On screen help assistant
- Programme Upgrades by Compact Flash Insertion
- Complete Networking capability
- Energy efficient drives
- Industry Standard Protocols

Benefits

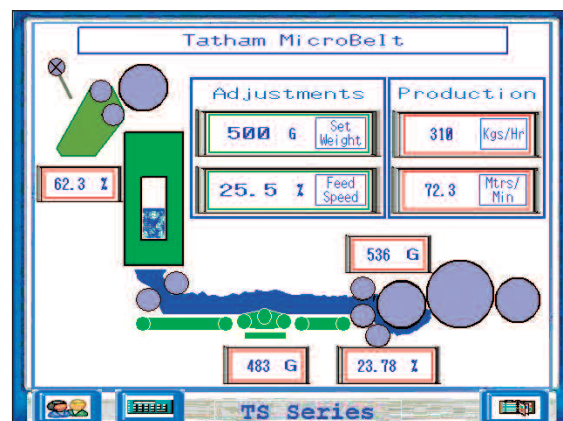

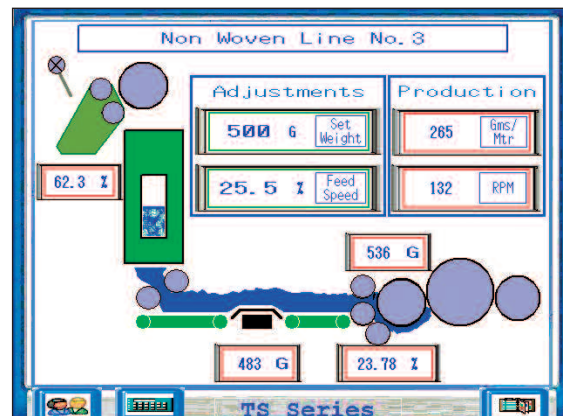

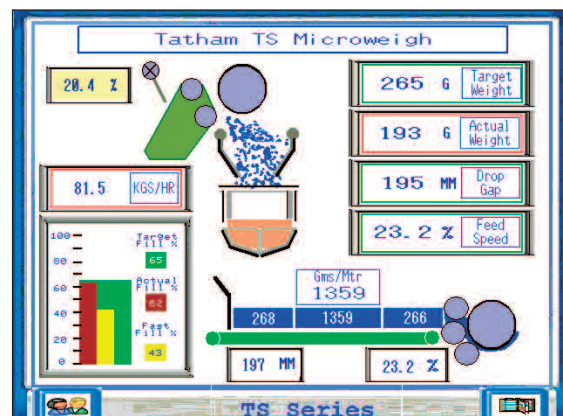

- Ensures uniform fibre weight into the Card even with large variation in fibre density
- Intelligent Drive system
- Simple operation and set up
- Memory to record processing data
- Improved web regularity and consequently product quality
- Fibre savings by operating at minimum weight required.
- System constantly enhanced so that new affordable and innovative options can be integrated.

The technology is offered as a retrofit system for application to any existing hopper, it is also possible to upgrade any existing weigh system to the latest technology for a minimum investment.

After Sales Service

Tatham dedicated service centre offers full support throughout the lifespan of your system, striving to ensure it remains reliable, efficient and cost effective.

- All parts are standard stock items
- On-line support and service
