The ultimate drive and control system for industry

tomorrows solution today

TS drives and controls

The new generation of TS drive and control equipment is characterised by the extent of its range and versatility in its applications across the textile industry and beyond.

- Blending systems
- Carding machines
- Spinning frames
- Twisting & Winding
- Nonwoven Cards & Cross-lappers
- Supervision and Control

TS Drive

The TS range of drive systems offers performance and reliability unparalleled throughout the industry, a design specification that has become a benchmark for leading edge design and operational performance.

- New control and logical components.
- High Technology AC Inverter Drives
- Energy efficient design
- Simple control without feedback devices
- Networking
- Video capture
- Remote internet diagnostic support
- Inter-changeability, cost effective options.
- SCADA linked
- TFT Graphic Display
- Industry standard protocols

TS Control

Automated Weigh Control systems for Carding/Blending applications (Microweigh, Microfeed & Microbelt).

Remote support services

All TS systems can easily be upgraded to include remote diagnostic support. It is possible to interrogate each inverter drive unit, PLC and HMI touchscreen from a dedicated web-based service centre. If the system is upgraded to the Full digital analogue diagnostic the system can be monitored from our new dedicated facility in Bradford. The system can also provide 'Mobile Text Messages' alerts to on-site engineers.

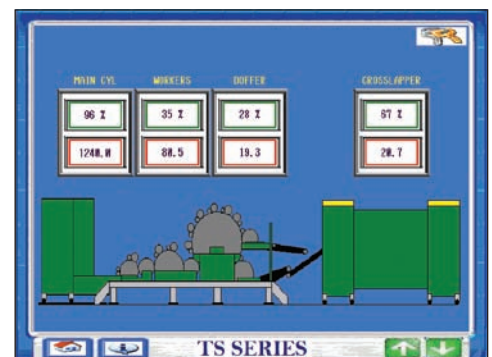

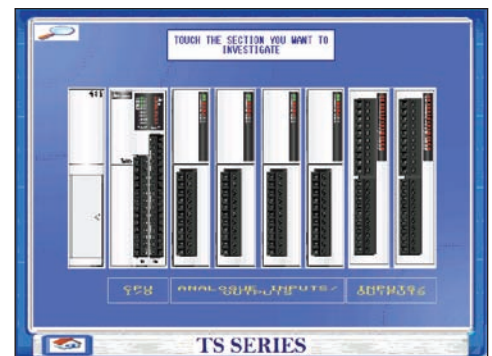

Design & build

Tatham has been designing, manufacturing, installing and commissioning electrical control systems for over 40 years. We have the flexibility to range from simple control panels to fully integrated complex systems. Our experience is backed by the very latest design and production facilities, enabling us to match engineered solutions to customer requirements. Our ability to provide systems based upon programmable logic, computers, microprocessors and SCADA packages means we can offer our customers a full range of products, expertise and turnkey solutions from a new dedicated facility. Our engineers have a background in the stringent textile processing industry but have more recently applied the same technology to a broad range of applications.

After sales service

We continue to provide full support throughout the lifespan of your system, striving to ensure it remains reliable, efficient and cost effective.

Tatham is committed to being a worldwide manufacturer of control panels and control systems. We are recognised throughout the world as a company that delivers unrivalled quality, from initial design through to manufacture, testing, installation and commissioning.
